

# ZERO-BURNING POLICY

- To La Joya S.A., the application of good conservation practice is a commitment for its impact zone, and fresh fruit bunches suppliers.
- In Ecuador, the burning of items such as petroleum products, demolition debris, tires, wood, garden waste, household garbage, almost everything processed or manufactured, derived from an agricultural operation, is prohibited, as established in the AGREEMENT NO. 061. AMENDMENT OF BOOK VI OF THE UNIFIED TEXT OF SECONDARY LEGISLATION. Art. 54c, of Ecuador's Environment Ministry (It is prohibited to burn waste and / or non-hazardous solid waste, hazardous and / or special waste in the open air).
- With this background, La Joya brings in to say NO to any activity that encourages and incurs the use of fires, both for its suppliers and for its production chain.
- At La Joya we promote garbage separation and classification or waste from palm oil activity, thereby facilitating efficient collection and the use of organic waste for composting.
